## LAKE GENOVA.

(Special Correspondence of the Gazette.)

LAKE GENOVA, Sept. 3, '85.

The season at Lake Geneva is now nearly ended and the grand wind up will be held on next Saturday. On that day the Lake Geneva Yacht club holds its annual regatta for the Sheridan cup.

Besides that, there will be an interesting programme of rowing events. The Pullman and Farragut clubs will both be present and had the makings place last Saturday the Evanston boys would have entered. There will be four shell races as follows:

First, a four oared shell race between the Farragut and Pullman clubs; second, a double scull; third, a senior single scull; and fourth a junior single scull.

Along the shore a number of swimming and boat races have been arranged for. This year the course for everything excepting the yachts will be laid out in front of Kays Park. Though so many people are leaving the camps now quite a number of them are coming in to take advantage of the fall fishing, and to enjoy the beautiful scenery. The appearance of the lake is never so beautiful as when the trees have been touched by frost and quite a number of those having private residences stay through September solely on that account.

Ossau.

OF FOR DODD AND WASHKOSK.

A delegation consisting of Mayor John Winans, City Clerk C. E. Church, City Attorney Wm. Smith, Ald. T. T. Croft, B. J. Daly, J. A. Fathers, Ben. George, Dr. W. H. Judd, P. J. Lennartz, J. B. McLean, and H. J. Rooney, the chief engineer of the fire department, his assistants and a delegation of firemen, in all numbering some thirty-five persons, will start at 8:45 this evening for Fond du Lac and Oshkosh, reaching Fond du Lac to-morrow morning where the party will take breakfast and look over the city for a few hours, then going to Oshkosh, which city they will reach about ten o'clock. At Oshkosh the party will inspect the Oshkosh fire department, the fire alarm system, the waterworks, and other city improvements, comparing them with our own. A few of the party will return home on Saturday night, the remainder extending the visit over Sunday. The party will meet at the west side engine house at eight o'clock this evening, and go from there direct to the Chicago and Northwestern depot, where a special car has been provided by the courtesy of the Chicago and Northwestern company.

Oshkosh has many improvements in her fire department, methods of conducting city government, street work and pavements, an inspection of which will be of great benefit to all members of the party. The chief engineer of our fire department notified the chief of Oshkosh that the party would visit them on Saturday and he has received a reply assuring him that the party will be well received, and the department of Oshkosh will be ready for inspection. The city council also appointed a committee, at the request of the chief engineer, to receive the party. The party will no doubt have a pleasant time and see many things that will be of interest to them.

A Feculent and Had Accident.

Fred, Parsons, the engineer at the steam laundry, met with a serious accident about half past four o'clock yesterday afternoon, which may leave serious results. Fred had just finished cleaning out the fires of his boiler and had closed the boiler head down, and as was expected, the soot in the front end of the boiler took fire and was burning. There is a damper in the smoke stack and it is the custom to open the damper when the fires are cleared, but this Fred forgot to do, and while the soot was burning he opened the end of the boiler when there was an explosion, and Mr. Parsons, who was in the engine room at the time, noticed Fred leaning against a partition in front of the boiler, enveloped in a sheet of gaseous flame. He had his hand, before his face, and before the others in the room could render him assistance he managed to escape from its fiery embrace. He sank down exhausted in another moment, and before a physician arrived he was delirious. Dr. Johnson was very soon on hand, however, and dressed the burns; and afforded the sufferer some relief from his pains, and he was taken home.

His face, neck and arms are badly burned, and he inhaled more or less gas, and it cannot be stated just yet how serious his injuries are.—Beloit Free Press.

As I leave Dr. Pierce, who holds out his pink hand to say good night, I catch sight of another patient—medicine man whose fortune was fabulous. I mean Dr. Helms.

Helms, a physician, is a man of great responsibility and demands respect from the masses of people in a line of his own profession. Dr. Helms, for years before his death, lived in a state of nervous prostration, and before a physician arrived he was delirious. Dr. Johnson was very soon on hand, however, and dressed the burns; and afforded the sufferer some relief from his pains, and he was taken home.

Protection for Nurses.

(Dr. C. M. Campbell in Courier-Journal.)

Place a branch of either sweet gum or sumach under the head of the bride. This car or May fly will vanish almost instantly and trouble the animal no more. This knowledge will, perhaps, be of especial service to those farmers living in or adjacent to large swamps, where these flies are hatched by millions, and cause much suffering to plow stock.

Peruvian Wine of Iron.

Is a certain preventive and cure for Fever and Ague, and persons of sedentary habits, and those troubled with sleeplessness, languor or indigestion to exercise will derive great relief from it. It is the preparation of Rev. Dr. J. W. Ryman and from sold only by Prentice & Erickson, opposite the postoffice.

Reduction in the Price of Gas.

To Gas Consumers:

Gas consumed on and after October 1, 1885, will be billed as usual at \$2.50 per thousand feet, but if paid promptly to collector when bills are presented, there will be a discount of 30 cents per thousand instead of 30 cents as heretofore, thus making the net price of gas \$2 per thousand.

## NOT PRETTY OUT OF WATER.

Description of the Hull of the Yacht Geneva.

New York, Sept. 4.—The exposure of the hull of the Geneva, as she appeared in the dry-dock in South Brooklyn, Thursday, was a revelation to the mariners who gathered about the dock and descended the steep flight of marble steps to study the bottom of the boat. The hull was about a foot wider than the deck beam measurement, and carried to a considerable depth. The entire hull presents not six inches of straight line, but in every part shows off to curves. The curve of the water straight enough, but the stern is nothing but a rank rake running from the rudder post under the counter to half way midship. The keel is little more than half the length of the hull. Fourteen tiers of copper sheathing, a foot wide cover the sides from the keel to within thirty inches of the deck-line. The general appearance of the yacht out of water is ugly in the extreme, but the piece of art and science of displacement and resistance while in motion.

At sunrise Thursday the crew were again at work finishing the cleaning, after which the copper was battered flat with the back of the water straight enough. Three or four sheets of copper were fastened on the port bands where the old sheathing had become detached. Mr. J. Beavor Webb, the designer of the yacht, was absent about the dock and watched the cleaning and coppering with interest.

A Brooklyn photographer took views of the yacht from five different positions, and at noon the sluices were thrown open again. At 2 p. m. the yacht was towed out of the dock and was towed over to Tompkinsville, Staten Island. The first race comes off Monday.

The boys were taken to a registered letter reached its destination when sent through the points named. Asking Rosencrans to Command Help Them.

WASHINGTON, Sept. 4.—The Democratic state central committee of Ohio have written an urgent appeal to Gen. Rosencrans to take part in the Ohio campaign this fall. The committee state that the contest will be very bitter and on the result will rest the political future of the party in that state. The committee add that if successful this fall, in the future the state will be really Democratic. The duties of his office make it impossible for Gen. Rosencrans to give a decided answer.
